Herbicide Treatment Business and Residential Notice

Distribution Date: 6-25-17

Various canals and waterway within the associated canal system maybe treated with aquatic herbicide(s) on /or between July 16 through July 31 and if needed again during September 15 through September 30 to control aquatic weed growth. **No applications will be applied during the weekend or holiday of any given week. All canals and waterways are not targeted.**

Product(s) planned for use:

Diquat, Imazamox, Imazapyr , Glyphosate and 2,4-D

Location of Treatment(s): Various canals within the Duck Lake water system.

Plants/Algae Targeted: Pondweeds, elodea, milfoil, coontail, parrotfeather, duckweed and other associated free floating species that may produce recreational problems.

The applicator will post signs in the treated and potentially affected areas no more than 48 hours prior to treatment. The signs will describe any water use restrictions or advisories.

If you are withdrawing water for potable or domestic water use, livestock watering, or irrigation, and have no alternate water source, please contact the applicator Northwest Aquatic Eco-Systems at 360-357-3285 or pondweeds@comcast.net to arrange an alternate water supply.

If you would like to request additional notification prior to treatment, or have further questions, please contact me using the information above.

This herbicide treatment is regulated under a permit issued by the Washington State Department of Ecology. Permit No. WAG 994141
